

# Coming Soon to your Area!

Your community's underground water mains are getting an upgrade!

Your local water utility, Middlesex Water Company, is working to continually improve service to you and your neighbors. As part of our annual water distribution system **RENEW Program**, we'll be upgrading underground water mains, service lines and meters that deliver your drinking water 24/7, 365 days a year. There will be road excavation work related to this infrastructure initiative but we will work to minimize inconvenience wherever possible as we strive to maintain uninterrupted water service throughout the project. As part of the meter replacement work, you may receive an additional notice from our contractor to schedule this work. We remind you to always ask for credentials prior to allowing any utility worker into your home. For added security, please call Middlesex Water at 800-549-3802 to verify the authenticity of the utility representative. We thank you in advance for your cooperation in this important project.

Investing in Infrastructure  
For Today & Tomorrow

## We're Investing in Your Drinking Water Infrastructure!

Middlesex Water Company will be investing over \$11.2 million dollars as part of its 2020 **RENEW Program** to replace aging water pipe throughout our service area. At the same time we may be replacing valves, fire hydrants or service lines in need of repair. This infrastructure project is designed to improve water quality, water flows and service with minimal service interruption to customers.

For more details about this project including a map of work areas, estimated project timelines and a list of Frequently Asked Questions & Answers, please visit:
